

BDMIT8-V5
PRO SUBWOOFER ENCLOSURE

The all-new VIBE BDMT8 enclosure is more than just a subwoofer box — it's a complete bass solution. Built around the proven BDMT8 subwoofer and precision-matched enclosure, this system is designed from the ground up to deliver powerful, controlled bass with maximum installation flexibility. Whether you're upgrading a daily driver or building a compact performance system, the BDMT8 enclosure delivers serious low-end impact without compromising space or budget.

Featuring VIBE's Multi Installation Technology (M.I.T), the enclosure can be installed in multiple orientations — including down-firing — to suit a wide range of vehicles and layouts. This not only protects the subwoofer but also enhances low-frequency coupling for deeper, more consistent bass response. Combined with the BDMT8's high-output design and VIBE's signature build quality, this enclosure offers smooth, musical bass with the ability to deliver impressive SPL when required. The BDMT8 enclosure represents outstanding value and is one of the most versatile, plug-and-play bass solutions VIBE has ever produced.

PASSIVE ENCLOSURE

Passive enclosure gives you flexibility and allows you to get the most out of this mini powerhouse subwoofer and works perfectly with our POWERBOX800.1 amplifier.

SUPERIOR AUDIO PERFORMANCE

Premium build with solid MDF, and textured carpet for signature VIBE aesthetics.

INSTALLATION VERSATILITY

The MIT platform gives you genuine flexibility where you need it most. Mount it down-firing for maximum output, rear-facing for directed energy, or fire it straight into the ski-hatch on coupes and cabriolets. Each orientation delivers the performance you're after without compromising boot space or installation aesthetics.
